Abstract: The abstract should summarize the contents of the paper in short terms, i.e. in up to 250 words. Please capitalize all major words in the title/heading, including the second part of hyphenated major words (e.g., Self-Report not Self-report). Please also capitalize all words of four letters or more. Please capitalize the keywords

Keywords: First keyword, Second, Third keyword

1 First section

1.1 Subsection

Please notice that there is no indent in the first paragraph of a section or subsection.

Nevertheless, following paragraphs are indented.

1.1.1 Three levels of headlines may be used

Please only use the formatting styles predefined in this file. Use the “Standard” formatting for the text.

Table 1. Table captions are automatically placed above the tables.

Hazard Class	A 1 to A III
Flash point	$< 21^{\circ}C / > 55^{\circ}C$
Density at $15^{\circ}C$	720 kg/m^3 to 860 kg/m^3
Kinematic Viscosity	0.65 to $4.0 \cdot 10^{-6} \text{ m}^2/\text{s}$

Tables and Figures are automatically centered.

- Bullet points may be used
- ...

1. Numbering may be used, too.
2. ...

Equations should be centered and set on a separate line.

$$x + y = z \quad (1)$$

$$a^2 + b^2 = c^2 \quad (2)$$

Whenever possible, use vector graphics and try to avoid rasterized images.

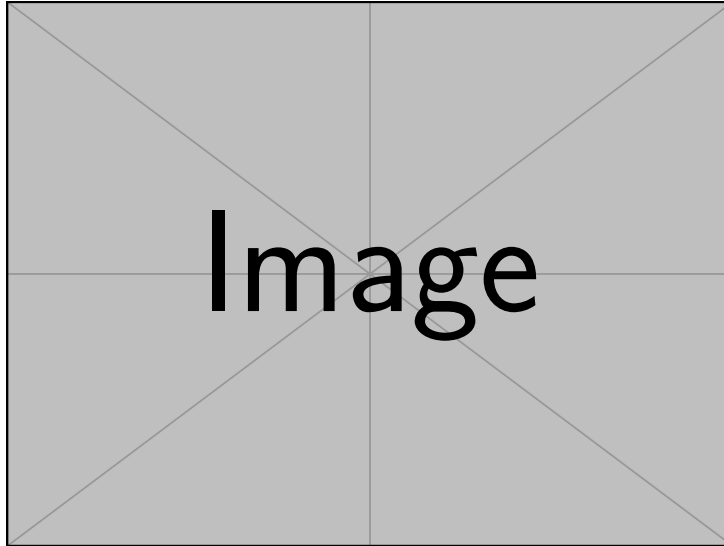

Figure 1. A figure caption is automatically placed below the illustration.

For citations of references, we prefer the use of square brackets and consecutive numbers, e.g. as shown by Author et al. [1], [2, pp. 5–10], as mentioned earlier [1]–[3]. The following bibliography provides the basic formats as a reference list with entries for journal articles [2], book chapter [1], as well as a URL [3]. For further guidance please refer to the [IEEE-Reference-Guide](#).

2 Second section

Data availability statement

Please include a statement on how the data supporting the results of your article/contribution can be accessed. If the submission is not based on data or the data it is based on is restricted (third-party data, legal or ethical constraints), this has to be explained in the data availability statement, too. Ideally, data should be deposited in a FAIR-aligned public repository. A registry to find suitable data repositories is re3data.org. Reciprocal linking of data and the article/contribution through persistent identifiers (e.g. DOIs) is best practice.

Underlying and related material

If you have other material which supports your findings (e.g. model code) or is closely related to your article/contribution (e.g. supplementary material as videos, samples, etc.) deposited on a repository, please include a brief description and the respective DOI(s) here.

Author contributions

Please include a statement on authors' contributions according to the [CreDIT](#) guidelines here. CRediT (Contributor Roles Taxonomy)'s intention is to recognize individual author contributions, reduce authorship disputes, and facilitate collaboration.

Competing interests

Competing interests arise when issues outside research may fairly be viewed as impacting the work's neutrality. All potential competing interests must be disclosed ("The authors declare the following competing interests: ..."). If there are no potential competing interests please state "The authors declare that they have no competing interests."

Funding

Please insert a funding statement (if applicable) here.

Acknowledgements

If you want to acknowledge persons or institutions you can do so here.

References

If you want to acknowledge persons or institutions you can do so here.

Please use [Biblatex](#). Add your references in *bib-format to the file local.bib.
